Comments: Dear Ms. Dixon;

1 I object to the Department of Energy storing hazardous nuclear waste at Yucca Mountain. How can you consider storing hazardous waste at Yucca Mountain when you have had seismic activity at that location. Another problem is transporting the waste over Nevada Highways. You are jeopardizing the safety of Nevada residents. Nevada does not produce electric from nuclear power and should not have to store waste from other states. Let the state that produce the waste keep it, or come up with another site that is safer.

WE were told that nuclear power was safe at Three Mile Island and recall what happened there. The government said above ground test at Yucca Flats was safe and the residence down wind ended up with a high rate of cancer. The politicians are shoving this down our throats and let me tell you I'm not happy.
